Report for MVOA GmbH

Sample ID	Brunswick Lab ID	ORACHydroFL* (μ moleTE/g)
Honey V/M/11-12-03	04-0131	4

*The ORAC_{FL} analysis, which utilizes Fluorescein as the fluorescent probe, provides a measure of the scavenging capacity of antioxidants against the peroxy radical, which is one of the most common reactive oxygen species (ROS) found in the body. ORAC_{hydro} reflects water-soluble antioxidant capacity. Trolox, a water-soluble Vitamin E analog, is used as the calibration standard and the ORAC result is expressed as micromole Trolox equivalent (TE) per gram.

Testing performed by J. Flanagan.

Approved by:  **Boxin Ou, PhD.**
