Report for MVOA GmbH

Sample ID	Brunswick Lab ID	ORACHydroFL* (μ moleTE/g)
C -10-03 Honey	03-1919	4

*The ORAC_{FL} analysis, which utilizes Fluorescein as the fluorescent probe, provides a measure of the scavenging capacity of antioxidants against the peroxy radical, which is one of the most common reactive oxygen species (ROS) found in the body. ORAC_{hydro} reflects water-soluble antioxidant capacity.

Trolox, a water-soluble Vitamin E analog, is used as the calibration standard and the ORAC result is expressed as micromole Trolox equivalent (TE) per gram.

+ Liquid samples weighed and extracted due to viscosity,

Testing performed by N. McHale.

Approved by:  Boxin Ou, PhD.
